Boom Cymru

Media Company

Boom is one of Wales's largest production groups. Established in 1994, they are a trusted, multi-genre company that produces over 400 hours of content annually for S4C, BBC, ITV and C5.

Challenge

- Existing network connections were limited the efficiency of business operations.
- Separate legacy phone systems were stand alone and not integrated causing internal communication issues.
- Integrate remote sites into a single unified network.

Solution

- Deployment of a fully managed MPLS network to link four core sites, with 500MB Fibre circuits with resilient 100MB backup circuits.
- Resilient Managed Firewall solution hosted in the core MPLS network with SIP Trunks delivered over the MPLS network to replace the ISDN lines.
- Avaya IP Office Telephony solution for 300 users delivered over multiple sites.

Result

“ Connexus have provided us with a robust and scalable network to meet our large bandwidth requirements and have revolutionised the way we move our large production files internally and externally. On top of this they manage all of our voice requirements with the Avaya IP Office and SIP trunking solution which has improved our communication and reduced our costs at the same time. ”

Rhodri James - IT Director
