

# The End of Windows 7 Support

All good things must come to an end, even Windows 7.

Microsoft has officially announced the "End of Life" date for Windows 7 support by the 14<sup>th</sup> January 2020. Windows 7 was introduced in 2009 and is one of the most popular versions of Windows

After Tuesday 14th January 2020, if you continue to use Windows 7 after support has ended, your PC will still work, but it may become vulnerable to security risks and viruses. Your PC will continue to start and run, but Microsoft will no longer provide the following support for your business.

No Technical Support

No Software Updates

No Security Updates

As a business running Windows 7 without the security patches and updates is not really an option as it creates liabilities in the event of data theft. To avoid security risks and viruses, We recommend you to upgrade to Windows 10.

# Let's find your next computer

Upgrade your computer to get Windows 10 already installed.

With Windows 10 at the heart of your device, not only are you getting some of the best power and performance available, you're also getting the latest in technology, design, and features.

# Windows 10 Benefits

## Benefits for businesses upgrading to Windows 10

Windows 10 is an entirely new version of the long-standing Windows operating system, bringing real benefits for your business. Whether using a tablet, handset or a laptop, work styles today mean our experiences need to be personal, efficient and mobile.

### Multitasking made easy

Windows 10, makes it much easier to juggle multiple open windows when you're working. Aero Snap offers other open windows to fill any open space automatically.

### Always up to date

With Windows 10, it's no longer possible to forget to run Windows Update, which means you're much less likely to miss a critical operating system patch that fixes a serious security problem.

### Advanced security & management

The new Windows OS has a range of advancements in security & identity protection that will help ensure the security of your data when moving from device to device.

### Improved device management

With Windows 10 brings built-in mobile device management capabilities & cloud-based functionality to laptops & desktops. With Active Directory and System Center to enable complete control over Windows devices.
